EDUCATION

Master of Science** in **Analytics - Statistical Modeling April.2025 - May.2027
Northeastern University Boston, MA
Bachelor of Arts** in **Economics** & **Business Administration Aug.2019 - May.2023
University of Florida Gainesville, FL
A.I. Fundamentals and Applications Undergraduate Certification

PROJECT

Retail Site-Selection Decision Support | Python, Flask, Azure SQL, Azure OpenAI, Leaflet, Chart.js

- Built an AI-driven web app that applies a **Huff gravity model** over an **Azure SQL dataset** of 149 neighborhoods and 4,000+ points of interest to predict daily visits and market share for candidate retail locations across 20+ business categories.
- Architected an **AI-as-controller chatbot** using **Azure OpenAI tool** calling so the assistant gathers inputs conversationally and invokes the real prediction engine rather than fabricating numbers.
- Engineered a **competitor-intelligence feature** surfacing nearby rival stores within a 3-mile radius with their distance, size, and foot traffic, plotted on an interactive Leaflet map alongside a Chart.js results dashboard.
- Implemented **tiered confidence labels** and **precision guardrails** to keep predictions trustworthy

WORKING EXPERIENCE

Data Analyst Sept.2024 - Jan.2025
Trip.com Shanghai, China

- Engineered scalable **ETL pipelines** in **MySQL** and **Python** to extract, transform, and load 2M+ customer records, automating rule-based user segmentation scripts that enabled large-scale **behavioral classification** across multiple business units.
- Designed and deployed 50+ **Tableau dashboards** using parameterized templates connected to live data sources, enabling self-serve **real-time KPI monitoring** across marketing campaigns and e-commerce funnels for cross-functional stakeholder teams.
- Built **SQL-based revenue forecasting models** aggregating multi-dimensional sales data to project market size and identify growth opportunities, translating **structured data outputs** into strategic recommendations adopted by senior leadership.

Marketing Database and Research Jun.2023 - Sept.2023
EasyTransfer Beijing, China

- Architected a SQL Server pipeline that automated **data extraction** across 30+ state-level datasets, integrating structured **data validation logic** to flag anomalies and ensure output integrity, improving overall processing efficiency by 80%.
- Scripted Tableau report automation that generated 3 standardized weekly intelligence reports, applying **rule-based pattern detection** to surface **data trends**, saving 60 labor hours per month.
- Developed Excel-based predictive models to analyze client transaction behavior patterns, generating **data-driven forecasts** that identified **operational inefficiencies** and informed process improvements, reducing profit loss by 8% and improving customer retention rate by 15%.

Healthcare Volunteer July.2025 - Present
Hebrew Senior Life Boston, MA

- Maintained accurate **clinical data records** for 100+ senior residents by coordinating daily health monitoring and medication tracking protocols, ensuring timely communication of patient status updates to nursing staff, contributing to measurable improvements in **care coordination quality**.

LANGUAGE & SKILLS

Technical: Excel/Numbers/Sheets, Python, MySQL, R, Tableau, Microsoft Office, Adobe Creative Suite
Language: English (Fluent), Chinese (Native), Japanese, Russian
